CHAANG-HORNG ELECTRIC CO., LTD.
Choose Chaang-Horng, Friendly, Reliable, Affordable

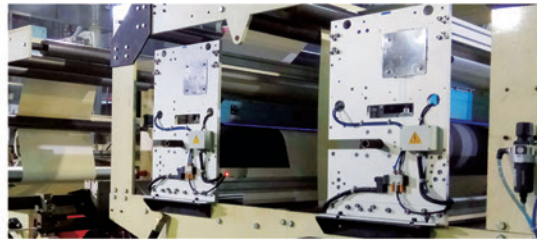

Since 1988

CHAANG HORNG ELECTRONIC

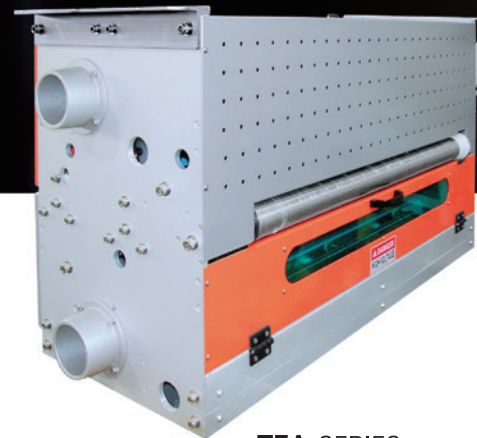

is a leading manufacture of CORONA and PLASMA systems used to increase the surface adhesion on plastic and metallized film and material. For 30 years Chaang Horng has been a driving force behind technology innovation, engineering the most versatile series of CORONA and PLASMA treating equipment. With more than 12,000 installations in the field of film extrusion, printing and converting, we have offered solutions globally, solved problems, and minimized downtime. We constantly provide improved adhesion and efficacy for our customers.

www.chaang-horng.com

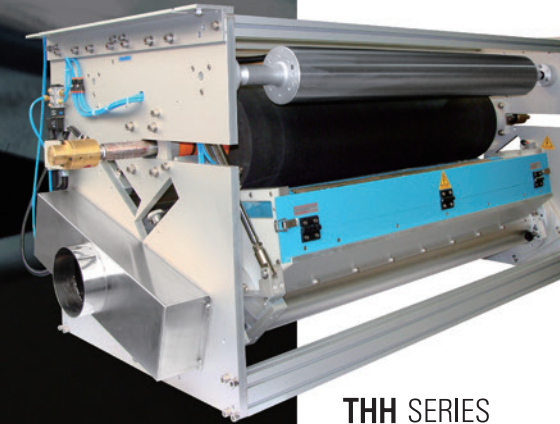

CORONA & PLASMA

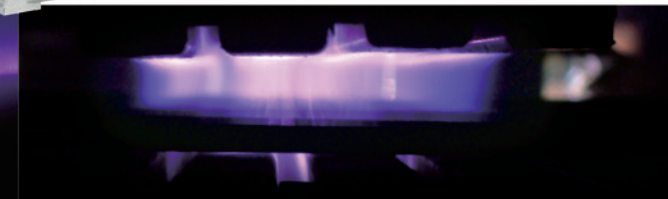

Founded in 1988. Chaang Horng became a leading pioneer of corona technology. To maintain our position as a market and technology leader, we incorporate our customers feedback to improve on designs utilizing corona and plasma technology. We are constantly refining our corona and plasma treatments to stay one step ahead of our customers demanding requirements.

TEA SERIES

THH SERIES

FRIENDLY

- Easy cleaning and service
- Simple integration into existing systems

RELIABLE

- Durable: Operates 24/7 under the most demanding conditions
- Heavy duty machine frame designed for long term use
- Spare parts available for every model manufactured
- Designed with safety in mind.
- CE listed. NRTL (UL) certification available

AFFORDABLE

- Lower cost
- Higher treatment level using lower power
- Uncomplicated
- Low cost maintenance

- Power: 1~40 Kw
- Treatment width: Up to 8000mm
- Web speed: Up to 500 M/m
- 1, 2, and 4 side treatment
